OBJECTIVES

    To gain utmost competence in the field of Computer Science & Engineering sector through enthusiasm, hard works, determination, dedication, sincerity and brilliance. Moreover, I want to develop my career in a well-established and fast-growing IT Industry where I can start my career as a Software Quality Assurance Engineer.

EXPERIENCE

Saimon Global Ltd- (From 2nd September,2021 to Present)
Software Quality Assurance Engineer

Responsibilities:

- Gathering the requirements from the customer in business words and translating them to the developers using technical terms.

- Design test plans, scenarios, scripts, or procedures. Here I prepare test cases according to customer requirement specific actions.

- Testing Lifecycle which I follow in my company - (**Smoke Testing**->**Adhoc Testing**->**Component Testing**->**Adhoc Testing**->**Integration Testing**-> **Adhoc Testing**->**System Testing**-> **Adhoc Testing**. When a developer fixes any issues of a particular module then I perform **Regression testing** and **Retesting** of that issues to ensure is there still exist that issue or not.

- Our company follows agile methodologies for creating any products.

- Using Postman and Insomnia for **API** testing.

- I always participate in product design reviews and requirements so that I can provide input on functional requirements, product designs.

- Here I create test case documentations so that it can help me to make sure that I have covered all the possible scenarios.

- Here I test mobile applications using **SauceLabs** on multiple devices before the final deployment.

- Here I create issues in **Bitbucket** and assign it to the developers.

- Here I maintain all operational Hassles according to business requirements.

- Sometimes I need to check logs to find the very specific issues when the developers are absent or busy with multiple tasks.

- Currently we are using **ClickUp** for tracking our task in a structural way. Here we create muliple tasks on daily basis.
